The Berkeley Clinic Guide to a Straighter Smile

The award winning experts at The Berkeley Clinic explain how you can get your perfect smile with our advanced straight teeth systems.

“Get the smile you have always dreamed of in as little as 6 weeks*”

**CALL OR CLICK NOW
ON 0141 564 1900**

to claim your complimentary straight teeth consultation worth £99 for free.

Welcome

Thank you for downloading our patient guide to straight teeth. My name is Dr Greig Mclean and I am the Clinical Director of The Berkeley Clinic in Glasgow, Scotland.

This guide will tell you everything you need to know about how you can straighten your teeth and what straight teeth systems are right for you.

“If you are unhappy with your crooked smile or you would like straighter teeth, then please book in for a chat and take advantage of our complimentary consultation, worth £99.

Ask yourself these quick questions.

- 1. Do you have crooked or bunched up teeth?***
- 2. Are you looking for an affordable and quick way to straighten your teeth ?***
- 3. Do you have gaps or spaces when you smile?***
- 4. Have you been told you were too old for braces?***
- 5. Would you like more confidence when you smile?***

If you answered yes to any of these questions then you could be suitable for one of our straight teeth solutions.

“For years my squint teeth made me self conscious and lacking in confidence. I didn't want train tracks as I thought they would attract more attention to my smile. From the moment I met the friendly caring staff to the day I finished my treatment the whole process was amazing. Everyone made me feel so relaxed and now I can smile with complete confidence!”

Alison – A Berkeley clinic straight teeth success story

We have successfully treated thousands of patients at The Berkeley Clinic and offer a full range of straight teeth solutions for every patient that comes to visit us. No matter what type of crooked or uneven smile you have, we will have a system to improve it.

Tell me about how you **straighten teeth at The Berkeley Clinic**

The Berkeley Clinic has been one of the UK's leading cosmetic dental centres for over 15 years. We have been straightening teeth since day 1 and are constantly striving to find better, faster and even easier ways to give our patients the smiles they deserve.

At The Berkeley Clinic we offer every type of advanced high speed brace available today. Almost all of them are invisible and pain free.

Take your time to read about what we do and how we do it. We will also answer a number of frequently asked questions for you. If you have a question that isn't on here, then get in touch today so that we can answer it!

What makes the Straight Teeth Solutions **at The Berkeley Clinic so unique?**

The Berkeley Clinic was built and designed to be one of Europe's most High Tech cosmetic dental centres. I won't bore you with all of the amazing equipment and Hi Tech gadgetry that we have however, I will explain how it helps us with our Straight Teeth solutions.

The Berkeley Clinic is unique in that it has a fully digital advanced dental laboratory on site which means that we can assess your smile for what is the best way to straighten your teeth. Most normal clinics need to send away impressions, sometimes abroad before a full assessment can be done. Whereas the majority of our patients can have their assessments done by our master technician all under one roof.

What else makes your **straight teeth solutions so unique?**

We believe that every patient is unique. As such we also believe that every patient will benefit from having a unique solution for straightening their teeth. Therefore, we offer multiple different systems to straighten teeth. From **invisalign, inman aligners, fixed train tracks to C Fast, Six month Smiles and quick straight teeth.**

I am an adult patient, **Can I still have my teeth straightened?**

You absolutely can have your teeth straightened as an adult. In fact a significant proportion of our patients are adults who have been unhappy with their teeth for some time and never had the chance to have braces as a child.

If you would like straighter teeth and are worried about having to wear train tracks then DO NOT WORRY. Get in touch today and we can explain how one of our invisible straight teeth solutions can help.

I had braces before and now my teeth are a little squint, **is there something you can do?**

A lot of people we see had straight teeth when their braces were taken off as teenagers then over time their teeth have gone squint again. For most people this is an easy fix and can sometimes be done in as little as 6 weeks.

If this is you then **call or click to get in touch today.**

I have heard that braces are very expensive. **How much do they cost?**

We have straight teeth solutions from £990 for simple cases. If you are worrying about the cost of straightening and perfecting your smile, then don't as we offer easy payment terms and finance for treatment where it is needed.

"I hadn't had confidence to smile fully for years. I always used to cover my mouth or smirk as my teeth were so crooked. It got so bad I was even embarrassed before my consultation. When I went to the clinic it was unlike any dental practice I had ever been in. The reception was like a friendly boutique hotel. Everyone was so friendly and welcoming from my first email to when I walked through the door. At my consultation I had everything explained to me and Alison and the team arranged a payment plan so that I could afford my straight teeth treatment. It is genuinely the best decision I ever made. Taking that first step to book an appointment has changed my life! Thank you so much guys! Keep making people smile"

Kate Edinburgh

The importance of a nice smile

Now more than ever people put a great deal of emphasis on a nice smile. That is why more and more patients are coming to us for their straight teeth treatment. Here are just some of the reasons how a straighter nicer smile can have a positive effect on your life.

1

Make a lasting impression: 29% of adults surveyed said the first thing they noticed when meeting a new person is their smile as well as 24% saying that it is the part they remember most.

2

Straight teeth = success: A recent study showed that people are 45% more likely to get a job if they have straight teeth when competing against someone with crooked teeth.

3

Love at first sight with straight teeth: People with straight teeth are 57% more popular on dating sites than those without.

How do your **straight teeth solutions** work?

The process of straightening teeth involves using clear aligners (the most well know system is invisalign) or train tracks (traditional braces) to straighten crooked or squint teeth. We offer both types of systems depending on what you the patient may need.

Visit 1

Come in for your complimentary consultation

When you come in for your consultation we will chat with you about what you are unhappy with, how your crooked, squint or gappy smile has been affecting your life and finally what straight teeth solutions will work for you.

Assess your smile for straighter teeth

We will then assess your mouth and smile and find out if you would prefer treatment using invisalign, 4D clear aligners, tooth coloured braces or finally hidden braces. The best end result is to choose a system that suits your lifestyle, your needs and also your budget. A lot of other clinics just use one system and try and railroad patients down that path.

Gently take measurements of your mouth

We will then gently take measurements of your mouth so that we can have a full assessment of your smile carried out by one of our master technicians.

We will give you an estimated treatment time and cost which will be verified when the full assessment comes back.

Visit 2

Come back for your new smile review

At this visit you will come back for a review of your new smile. You will be able to see how it will look and get a final cost and treatment time estimate. When you are happy to go ahead we will book you in for your fitting appointment and sort out any easy payment plans that you have requested.

Visit 3

Until your new smile:

We will be here to look after you for the whole process until your treatment is finished. WE offer lunch time and late night appointments so that you can fit your straight teeth around your work or social life!!

Final
Visit

At your final visit we will fit you with a set of retainers and let you enjoy your beautiful new smile!!!

The Berkeley Clinic High Speed Invisible Braces.

The Berkeley Clinic high speed straight teeth solutions are the perfect answer for people who would like straighter more perfect teeth without having to wait 2 years or more wearing train tracks!. Our high speed braces are safe, effective and affordable with our easy payment plans.

“It only took 5 months”

“Now I have my perfect smile! Thank you guys!”

“Thank you so much for the wonderful, gentle and caring treatment that you gave me. I was nervous before starting but am much happier about my smile and about going to the dentist now. I wish I had found you guys years ago!”

Steven R, Glasgow

How much do high speed invisible braces at **The Berkeley Clinic** Cost?

The good news is that we can almost always find a solution for you and your smile. We have high speed invisible braces options from as little as £990 per case. We cannot tell you what your new smile will cost in this guide but we can assure you that because of the large number of invisible cases that we successfully do we can offer competitive pricing or easy payment options for every patient. If you are one of the nearly half a million patients in Scotland who find that their smile is making them unhappy then click or call today to start the journey to your straighter smile.

So what are you waiting for. Book your no obligation consultation worth £99 for free today!

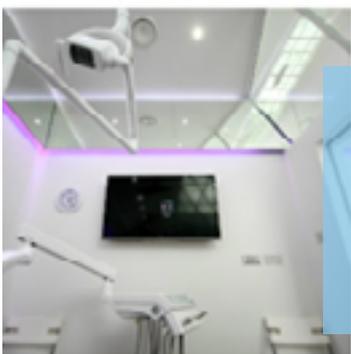

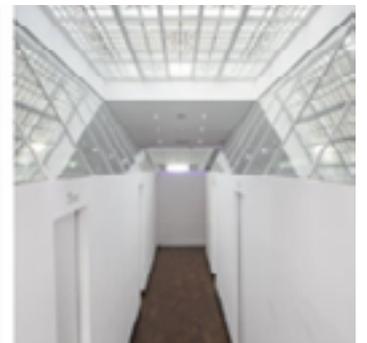

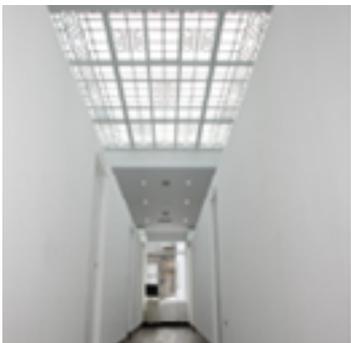

"I actually looked forward to visiting the clinic. The staff were so friendly and I saw results almost straight away."

- Nicola M Glasgow

"Nobody even knew I was wearing braces, They are so much better than the train tracks I had as a teenager"

- Steven M Edinburgh

"The 3D scanning technology was amazing, I could see how my smile was going to look before and after treatment. Thank you guys. Now I can smile"
